Tuscan materials/colors.

Fits Model Years 2008-2010

Ford Custom Accessories wheels and tires are designed as a system and must be used as such. Larger-sized systems may require a new spare tire and additional components. Also, tire chains cannot be used due to lack of clearance to the wheelhouse. Trucks equipped with accessory wheel-and-tire systems are not compatible for use with snowplow equipment. For approved tire-and-wheel systems and other important information, see your dealer for details or visit Tech Specs at [fordaccessories.com](http://fordaccessories.com).

### USING DIFFERENT-SIZED WHEELS OR TIRES

Adding wheels or tires that are a different size than your original equipment wheels and tires may affect the performance and/or electronic systems of your vehicle – including its braking, ride-and-handling characteristics, stability, resistance to rollover, fuel economy and tire traction (on wet, dry, snowy or icy roads). Changes in vehicle performance are not covered by the New Vehicle Limited Warranty.

### REPLACING TIRES

Ford Motor Company strongly recommends that your replacement tires be the same as your vehicle's original equipment tires to ensure proper levels of performance and safety during normal use. Ford, Lincoln and Mercury vehicles were developed and matched with specific tires and wheels. If you choose different replacement tires, make sure they are the same size, load range, speed rating and construction type (radial- and bias-belted tires) as your vehicle's original equipment tires.

### WARNING

Your vehicle may not provide an acceptable level of performance and safety if you use tires not recommended for your Ford Custom Accessories wheels. You may increase the chance you will crash and suffer serious injury. Only use specified tires, and install the additional component-kit upgrade required on certain Ford, Lincoln and Mercury vehicles.
